Process & Steam Specialties

COVID-19: Policy Update

All Visitors:

The entire team at Process & Steam Specialties would like to take this opportunity to address the evolving measures of COVID-19.

Since the beginning of the pandemic, we have always maintained the highest standards of health and safety in all our facilities. We thank you for helping to provide a safe working environment. The safety of our employees and yours will remain our top priority.

We continue to monitor the health situation closely and ensure compliance with public health recommendations. With the presence of the Delta variant, our health and safety protocols in all our facilities have been reinforced.

Effective October 11, 2021, all visitors must comply with the following conditions before visiting any PSS facilities:

- Be fully vaccinated (have received two doses)
- Provide proof of full vaccination (QR code) or printed proof of full vaccination
- Complete the COVID-19 screening visitor log available at entrance

For non-vaccinated providers:

- Provide a negative PCR test obtained no more than 72 hours prior to the facility visit
- Complete the COVID-19 screening visitor log available at entrance

At all times:

- Wear mask (except while alone in work stations)
- Physical distance of two (2) meters or (6 feet) must be respected

As one of Canada's leading suppliers of industrial process equipment, we remain committed to you and to do our part as an organization to continually support the health and well-being of our visitors and employees. To ensure the health and safety of all, we thank you for respecting these protocols and we count on your cooperation.

Regards,

The COVID-19 Health and Safety Team
